Todd Yu

toddy9229@outlook.com / 0424891952 / Donvale, VIC 3111 / Portfolio: https://xinzhepersonal.netlify.app/

Summary

Software Engineering student and full-stack developer with hands-on experience building end-to-end applications across frontend, backend, databases, APIs, cloud deployment, and AI-enabled features. Experienced with React, Next.js, Node.js, Express, RESTful APIs, PostgreSQL, and modern software development workflows.

Strong understanding of software engineering fundamentals, including application architecture, API development, database integration, version control, testing, CI/CD principles and the full software development lifecycle. Experienced in AI-assisted software development using tools such as OpenAI Codex, Claude and other platform to support coding, debugging, testing and development productivity. Able to use AI effectively while independently understanding and validating requirements, implementation logic, security, and maintainability.

Working Experience

Doncaster Garden Club - Web Developer (volunteer)

06/2024 - Current

Doncaster, VIC

- Develop and maintain responsive web features, backend services, and deployment workflows.
- Migrated image storage from AWS S3 to Cloudinary and supported backend hosting through Railway to reduce operating costs.
- Work directly with stakeholders to gather requirements and translate business needs into practical technical solutions.

MACV- Education Administration Programs - Web Developer (volunteer)

03/2024 - 10/2024

Melbourne, VIC

- Build MACV local learning platform by using Node.js, React, Javascript, HTML, CSS, Github and other skills.
- Communicated with MACV team to gather information and requirements, provided technical analysis, and translated them into functional specifications with recommendations.
  Assist with the deployment details including domain name purchasing and low-cost host platform selecting.

More project

Skills

- **AI tools:** Codex, GitHub Copilot, Claude
- **Programming language:** Python, JavaScript, TypeScript, Java SE 17, C#, PHP, Ruby, basic c++
- **Frameworks:** React, Next.js, Vue.js, Redux, Express.js
- **Environment & Tools:** Node.js, npm, Vite, Git, GitHub, Postman
- **Database:** MySQL, MongoDB, PostgreSQL, MariaDB
- **Cloud platform:** AWS, Google Cloud
- **Software Engineering**: System design, application architecture, SDLC, API design, database integration, version control, Agile development, CI/CD and deployment practices

Education and Training

Expected in 11/2026
Swinburne University of Technology
Melbourne, VIC
Bachelor of Computer Science:
Software Engineering

Digital Career Hub with AI-Powered Resume Review - Full-Stack Developer / Capstone Project

03/2026 - 09/2026
Melbourne, VIC

- Developed a full-stack AI-powered career platform using Next.js, Node.js, Express and PostgreSQL, integrating frontend, backend and database services.
- Implemented AI resume analysis and scoring, interview question generation, cover letter generation, authentication, role-based access control and multilingual support.
- Contributed to deployment, testing, Git workflow and team feature integration, with the application deployed through Vercel and Neon PostgreSQL.

Australian Road Crash Data Visualisation - Data Visualisation Developer

2026
Melbourne, VIC

- Developed an interactive Australian road safety data visualisation website using D3.js to explore crash and hospitalisation trends.
- Cleaned, transformed and standardised datasets covering states, age groups, gender, road-user categories and First Nations data using KNIME Analytics Platform.
- Built interactive charts and visual exploration features to communicate road safety patterns and trends across Australia.
